## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 2/19/02 has been considered.

### ***Specification***

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1, 2 and 10 are rejected under 35 U.S.C. 102(a) as being anticipated by Nilles et al. (6,246,222).

Nilles et al. disclose a switching DC-DC converter and conversion method with rotation of control signal channels relative to paralleled power channels in Figs. 2 and 6. Pluralities of circuits- MOS1 to MOS3, controller-31, drive signals-36-38 and output voltage-V out.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2838

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Wickersham et al. (6,362,607).

Wickersham et al. disclose a gated multi-phase fixed duty cycle voltage regulator in Figs. 1 and 2. Pluralities of circuits- 110-1 to 110-M, controller-104, drive signals-108 and output voltage-112.

***Allowable Subject Matter***

7. Claims 3-9 and 11-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Clarkin et al. disclose a voltage regulation employing a composite feedback signal. Andruzzi et al. disclose a method and apparatus for virtual current sensing in DC-DC switched mode power supplies. Boeckmann et al. disclose a parallel phased switch control.
